About This Game

OVERVIEW

This is a VR supported Game, you can walk and interact with everything with your handle.

You will stand in a strange room, and must find the clue and solve the puzzles to escape.

Be careful☹ so you won't miss any useful object in the room.

And also be patient☹if you feel confused , just try to "destroy" something in the room.

Don't hesitate, put on your VR headset and be a detective in this virtual world.

HOW TO PLAY

Most of the objects in this room is interactive,some are useful to solve the puzzle☹such as the mirror,the clock,the PC,etc.while others are just for fun.

But that is all I can tell you. It is important and also joyful to gather up all the clues and escape from the room by yourself.

After only about 20 minutes I got stuck. I am very confident what I was doing was meant to work but it seems the items are not working correctly and the hint was to something that could not be interacted with. I may be wrong but there are bugs.. I thoroughly enjoyed this game a very well though escape room.

My only problem was that the puzzles were pointless I didn't have to any of them except the obvious ones so I was able to escape while only completing the one line of puzzles because I was able to guess the rest of it.

However a very nice escape room.. Funny, tiny escape room. Ok puzzles. Took half an hour to solve.. Pretty good for the money! I liked it. Half an hour of basic escape room. The physics are really twitchy and it was really difficult to pick things up from floor level. There are a few puzzles to figure out and they are OK. Overall it just feels really generic. It's not expensive, but at the same time it's fiddly and not massively satisfying. If you see it on sale then maybe, but there are a bunch of far better examples of the genre available, especially if you spend a little more money.
